## TECHNICAL SKILLS

|                           |                                                                         |
|---------------------------|-------------------------------------------------------------------------|
| Machine Learning & AI     | LLMs, GenAI, RAG, Agentic AI, NLP, Deep Learning, Transformers          |
| Frameworks & Libraries    | PyTorch, scikit-learn, Tensorflow, TFRS, LangChain, LlamaIndex, FastAPI |
| Backend & APIs            | Python, Java, Spring Boot, Django, FastAPI, REST APIs, MCP              |
| Databases & Storage       | MongoDB, PostgreSQL, Redis, MySQL                                       |
| Cloud, MLOps & Deployment | AWS (SQS, S3), GCP, Docker, vLLM, MLflow, CI/CD, Grafana, Loki          |
| Frontend & Visualization  | Matplotlib, Plotly, Streamlit, JavaScript, HTML/CSS,                    |

## EXPERIENCE

|                                         |                                        |
|-----------------------------------------|----------------------------------------|
| Machine Learning Engineer<br>OfBusiness | May 2024 - Present<br>Gurgaon, Haryana |
|-----------------------------------------|----------------------------------------|

- Built an SQS-driven **AutoML platform** serving **27 production models** using MLflow, S3, and automated champion-challenger deployment with F1 and recall quality gates, reducing model deployment effort by **90%**.
- Built an ML system with **dual confidence thresholds** under a  $\geq 98\%$  recall constraint, routing low-confidence predictions to Gemini for automated label correction, retraining, and cost-controlled human-free review.
- Designed a **FAISS-backed RAG pipeline** using LlamaIndex, HNSW, Sentence Transformers, GPU/CPU routing, and BGE reranking, reducing manual tender processing by **90%**.
- Built a production **document extraction service** using Gemini with token-aware routing and multi-format ingestion (PDF, DOCX, DOC, XLS, XLSX, RTF), increasing document coverage by **98%**.
- Designed an autonomous **MLOps triage agent** using Qwen3-30B, vLLM, and **18 MCP tools** for production incident investigation, grounded root-cause analysis, and gated automated PR generation.
- Built automated **LLM evaluation framework** and Redis-backed **LLM cost governance** and monitoring dashboards, reducing accidental inference cost by **100%** while tracking spend, accuracy & prediction volume.
- Productionised **ML classification services** for tender auto-labelling, sector tagging, contract classification, and news relevance with FastAPI, GPU/CPU routing, and Gemini fallback.

**Tech Stack:** Python — FastAPI — MLflow — AWS SQS/S3 — LlamaIndex — MongoDB — redis — Docker

|                                        |                                         |
|----------------------------------------|-----------------------------------------|
| Software Engineer Intern<br>OfBusiness | Nov 2023 - May 2024<br>Gurgaon, Haryana |
|----------------------------------------|-----------------------------------------|

- Built a **Redis cache rollover mechanism** reducing memory usage by **2GB/day** across production services.
- Developed **microservices** and large-scale Selenium **scraping pipelines** for BidAssist ETender data ingestion.
- Built **document parsing pipelines** using OCR and CSV processing integrated with AI-based data extraction.

**Tech Stack:** Java — Spring Boot — Python — Redis — Selenium — REST APIs

## PROJECTS

**AI SOC & DevOps Orchestrator:** Architected a **multi-agent AI system** that unifies Security Operations (SOC) and DevOps health monitoring using an event-driven & polling hybrid architecture. Built a **Global Orchestrator** with agentic workflows that dispatches to specialized agent swarms for threat detection and self-healing infrastructure. Built **confidence-gated automated remediation**, threat intelligence enrichment, and proactive patrol scheduling.  
**Tech Stack:** Python — LangChain — Multi-Agent Systems — Agentic AI — Kubernetes — AWS — ADK

## EDUCATION

|                                                                                          |             |
|------------------------------------------------------------------------------------------|-------------|
| Bachelor of Technology (IT)   Galgotias College of Engineering and Technology   7.7 CGPA | 2019 - 2023 |
|------------------------------------------------------------------------------------------|-------------|
