TECHNICAL SKILLS

Python | C/C++ | Java | Data Structure | Algorithms | SQL | Git & Github | Linux | Spring Boot |
Microservices | Operating System | OOPS Concept | HTML & CSS | JavaScript

EXPERIENCE

Machine Learning Engineer

May 2024 - Present

OfBusiness

Gurgaon, Haryana

- Built and deployed ML models for tender classification and information extraction, using NLP techniques, OCR post-processing, and embedding-based retrieval with Open-Source Embedding Model.
- Developed a scalable pipeline to autolabel tenders using multilabel classification; integrated it into production with model serving via FastAPI and GPU/CPU-based routing.
- Designed a feedback loop using Streamlit and managed continuous improvement of model performance via human-in-the-loop tools like Label Studio.
- Automated model training and evaluation pipelines using integrated data versioning and experiment tracking with MLflow.
- Optimized similarity search in a review dashboard using FAISS to find mismatches between predicted and reviewed categories for model debugging.
- Collaborated cross-functionally to build a news relevancy classifier using deep learning for downstream business applications.
- Designed and implemented a personalized recommender system using TensorFlow Recommenders (TFRS), improving recommendation accuracy and enabling scalable end-to-end model training and deployment.

Tech Stack: Python — Vertex AI — FAISS — GCP — BERT — Tesseract — Redis — Docker — TFRS

Software Engineer Intern

Nov 2023 - May 2024

OfBusiness

Gurgaon, Haryana

- Developed cache rollover mechanism, reducing server Redis usage by 2GB per day and enhancing over efficiency.
- Developed Spring Boot microservices with Tomcat, RESTful API and implemented web scraping code for managing the crawling application in a production environment at BidAsist ETender portal.
- Successfully designed and implemented crafting cutting-edge parsing solutions, adept at handling PDFs, OCR with Tesseract, and CSV parsing. My distinctive edge comes from seamlessly incorporating AI-models, ensuring efficiency in extracting valuable insights.

Tech Stack: Java — Spring Boot — Redis — Selenium

PROJECTS

E-Commerce-Microservices: A project which consists small, independent software components that work together to provide e-commerce functionality. It is based on REST Microservices architecture as a collection of small, loosely coupled services that communicate with each other through APIs.

Tech Stack: Java — Spring Boot — MySQL

Github Repo: [Dark-Ultron/E-commerce-Microservices \(github.com\)](https://github.com/Dark-Ultron/E-commerce-Microservices)

EDUCATION

Bachelor of Technology(IT) | Galgotias Collage of Engineering and Technology | 7.7 CGPA

2019 - 2023

Senior Secondary | Bihar School Examination Board | 65.2%

2015 - 2017

High School | Central Board of Secondary Education | 9.6 CGPA

2014 - 2015
